

DID YOU KNOW?

FLU-LIKE ILLNESSES PRESENT A MAJOR CHALLENGE FOR HEALTHCARE FACILITIES, WITH **40,000 LABORATORY-CONFIRMED CASES OF INFLUENZA BY MID-2019** - ABOUT THREE TIMES THE USUAL NUMBER RECORDED. IN AN AVERAGE YEAR, **3,000-4,000 PEOPLE DIE** FROM FLU-RELATED COMPLICATIONS¹

- Studies show that for every employee who comes to work sick, up to **18% of their colleagues will become infected** as a result.²
- When an infected person sneezes or coughs, **droplets containing germs are released, spreading the virus**. Germs invariably land on doors knobs, desks and other surfaces that can come in to contact with people.³

Fight germs where they spread
in the air, on surfaces and on hands

HELPING YOU FIGHT GERMS WHERE THEY SPREAD... COLD AND FLU ESSENTIALS...
