Changes for Bulk Billings Incentives for GPs

From 1 November 2025, the Australian Government will support thousands of general practices to bulk bill every patient, with the launch of the Bulk Billing Practice Incentive Program (BBPIP).

Practices participating in BBPIP will receive an additional quarterly 12.5% incentive payment on MBS benefits paid from eligible services, split evenly between the GP and the practice. The even split of the BBPIP incentive payment recognises the role of both practices and GPs in delivering bulk billed services to patients.

Participating practices must bulk bill every eligible service for every Medicare-eligible patient, to receive the BBPIP incentive payment. This incentive payment will be in addition to Medicare benefits and MBS BBIs.

Registration for BBPIP will be open from 1 November 2025. Practices will need to register for BBPIP via Services Australia's Organisation Register.

There are a number of resources the Government has made available to support healthcare providers with additional information regarding this incentive program. Please scan the QR codes below to access these resources:

BULK DISCOUNTS AVAILABLE! Speak to your Personal Account Manager today

We are pleased to advise that the global supply issues affecting IV fluids have improved significantly. All sodium chloride lines are once again available, and we are no longer experiencing shortages.

To help ensure fair distribution and ongoing stability, we will be keeping restrictions on order quantities in place for the time being. These restrictions will be gradually reviewed and lifted once we are confident that continuity of supply can be maintained.

We thank you for your patience and understanding throughout this period and will continue to keep you updated as the situation progresses.

Durable protection for at-risk or severely dry skin

3M™ Cavilon™ Durable Barrier Cream

Formulated with 3M polymer technology, 3M™ Cavilon™ Durable Barrier Cream is a concentrated, fragrance-free moisturising skin barrier that resists wash-off and allows adhesives to adhere.¹ It's ideal for moisturisation of at-risk and/or severely dry skin. It also provides a barrier which protects skin at low risk for breaking down.¹

What's new in 2026

As we look ahead to the 2026 flu season, there is an important shift underway in Australia's seasonal influenza vaccination strategy. The Australian Technical Advisory Group on Immunisation (ATAGI) and other health authorities have signalled a transition from **quadrivalent influenza vaccines (QIV)** to **trivalent influenza vaccines (TIV)**. This transition follows the northern hemisphere implementing this change as of the 2024-2025 season.

The quadrivalent vaccines currently protect against four strains of influenza: two A subtypes (H1N1 and H3N2) and **two B lineages (Victoria and Yamagata)**. However, the **B/Yamagata lineage** has not been detected in circulation globally since March 2020.

Because of this, the World Health Organization (WHO) and Australia's Influenza Vaccine Committee (AIVC) have deemed that continuing to include the B/Yamagata antigen is no longer necessary. As a result, vaccines that include only one B lineage (i.e. TIVs) are now being recommended and will be the norm moving forward into 2026.

Pre-orders are officially open! **SCAN the QR code** or head to our website sssaustralia.com.au/2026-influenza-season for all the details and to secure your order today.

SUSTAINABLE PRODUCT RANGES

SSS Australia has a number of products in our catalogue from suppliers who are at the forefront of environmentally friendly healthcare.

Colloidal Oatmeal System!

Coats Nitrile Biodegradable Powder Free Glove N/S

GloveOn® COATS® Biodegradable glove utilises the powerful benefits of colloidal oatmeal-a U.S. FDA-recognised skin protectant. The all-natural skin-nourishing ingredient strengthens the skin barrier and locks in moisture to prevent skin irritation and discomfort experienced with wearing regular gloves. Additionally, GloveOn COATS Biodegradable glove contributes to environmental sustainability by accelerating biodegradation when exposed to landfill conditions, helping users protect and moisturise their hands while making an eco-conscious choice
