Quality Standards Update

From **1 November 2025**, the Strengthened Quality Standards guidance for aged care will formally take effect. These refreshed Standards are being introduced to raise expectations around person-centred care, safety, governance and continuous improvement.

The strengthened Standards are organised around seven core domains:

- **The Individual** - how each older person is treated with dignity, respect and choice
- **The Organisation** - governance, leadership and quality systems
- **Care and Services** - planning and delivering care in a person-centred way
- **The Environment** - ensuring safe, accessible and supportive surroundings
- **Clinical Care** - safety, coordination, evidence-based multidisciplinary care
- **Food and Nutrition** - the dining experience, nutrition, and mealtime wellbeing (residential services only)
- **The Residential Community** - promoting inclusion, belonging and quality of life (residential services only)

Because the guidance is intended as a support tool and not a prescriptive rulebook, providers are encouraged to tailor their approach. What matters is how service delivery responds to each resident's goals, preferences, risks and changing needs.

Reach out to your **Personal Account Manager** to discuss how we can help you interpret and integrate the new guidance, ensuring your services remain safe, high quality, and aligned with best practice.

The guidance isn't a rigid checklist, it's a framework that outlines:

- expectations of older people
- the intent behind each standard
- the outcomes to be achieved
- why those outcomes matter
- and examples of actions and key tasks providers can take to satisfy each outcome.

WE WANT YOUR FEEDBACK ON SSS AUSTRALIA EVENTS!

SSS Australia strives to connect you with high quality, relevant education to facilitate your continued professional development, and to do that we want your feedback! For your time, we would love to offer a **FREE** pulse oximeter for completing our survey.

Premium Lift Ultra Low Bed

PremiumLift Ultra Low Bed is a unique system, which allows the platform to be lowered to as little as 6.7cm from ground level. The lowering rate will automatically reduce when it reaches 120mm from floor level, to allow the operation to be stopped and the bed raised before any limb or object becomes trapped, ensuring complete user and patient safety.

1427970	Beech Single 7cm-64cm SWL 185kg	Each	\$2,810 ^{90*}
1427962	Beech King Single 7cm-64cm SWL 185kg	Each	\$3,114 ^{80*}

ConvaMax Superabsorber Non-Adhesive Dressing
Usable as either a primary or secondary dressing, ConvaMax is a superabsorber dressing designed to manage the challenges around highly exuding wounds. It combines high performance with softness and conformability. Highly absorbent, even under compression, it locks excess exudate and bacteria away from the wound to maintain skin integrity and support healing.

- High fluid absorption
- High retention of fluid and bacteria
- Protease modulation
- Soft and conformable

ConvaMax™ combines high absorption and retention to effectively manage high levels of exudate while protecting skin integrity.
