System Upgrades, NAIDOC Week, World Alzheimers Month, Infection Prevention Guide, and more!

Welcome to the third edition of Spotlight for 2026. We hope that wherever you are you are keeping warm as the temperature continues to drop.

Firstly, we would like to sincerely thank all of our customers for your patience while we undertook business system upgrades in May. We are pleased to report that we have returned to regular operational capacity.

There are a number of events coming up in Q3 that we're excited to highlight throughout this edition.

At the start of July is NAIDOC Week from the 5th to the 12th. This year is especially significant as we celebrate 50 years of Deadly, a milestone for such an important movement. Read more over the page.

Coming up in the latter part of the quarter is World Alzheimer's Month in September, culminating in World Alzheimer's Day on the 21st. Various events and initiatives are held throughout the month with many ways to get involved. Turn to page 4 to find out how you and your facility can participate.

In this edition as well we have produced an Infection Prevention Product Guide as the centrefold pullout. It features 7 ways you can manage Infection Control in your facility. We hope you find it helpful!

Lastly, we're turning 50! This October is our 50th anniversary in business and we're planning a number of fun ways to say thank you to customers new and old who have helped us get this far. We're excited to celebrate with you soon, and continue doing More For You for the next 50 years.

National NAIDOC Week celebrations are held across Australia in the first week of July each year (Sunday to Sunday), to celebrate and recognise the history, culture and achievements of Aboriginal and Torres Strait Islander peoples.

NAIDOC Week is an opportunity for all Australians to learn about First Nations cultures and histories and participate in celebrations of the oldest, continuous living cultures on earth. You can support and get to know your local Aboriginal and/or Torres Strait Islander communities through activities and events held across the country.

50 Years of Deadly

For five decades, NAIDOC Week has celebrated the voices of Aboriginal and Torres Strait Islander communities: steadfast, unapologetic, and proud. Each year, its themes have called for truth, celebrated culture, honoured resistance, and reaffirmed identity.

"Fifty Years of Deadly" marks a significant milestone. It stands as a tribute to those who have built and sustained this movement: the Elders who stood firm, the organisers who created space, the artists who transformed resistance into expression, and the communities who continue to show up year after year.

This moment is about reflecting on the stories, marches, languages, art, and leadership that have shaped the journey. It recognises the strength required to reach this point and acknowledges the progress achieved not by chance, but through the determination of generations who refused to be silenced.

It is also a recognition of the present. Grounded in culture and strengthened by identity, Aboriginal and Torres Strait Islander people continue to lead change across every field from health and education to media, business, and the arts, telling their stories with authenticity, authority, and purpose.

SSS Australia is proud to partner with brands that celebrate Indigenous artistry, offering beautifully designed printed products that honour culture, storytelling, and the spirit of NAIDOC Week.

Each September, people unite from all corners of the world to raise awareness and to challenge the stigma that persists around Alzheimer's disease and all types of dementia.

During **World Alzheimer's Month**, individuals and organisations are encouraged to show their support by getting involved in the campaign.

World Alzheimer's Day is observed on 21 September each year, during World Alzheimer's Month. In the lead-up to and on the day, Alzheimer's and dementia associations worldwide host memory walks, fundraising initiatives, and awareness campaigns to highlight the impact of Alzheimer's disease and other forms of dementia within their communities.

There are many ways to take part in World Alzheimer's Month, including sharing messages on social media, attending events hosted by national associations, or contributing to fundraising efforts. Every action, no matter how small, plays a meaningful role.

Introducing Tubular Form Black

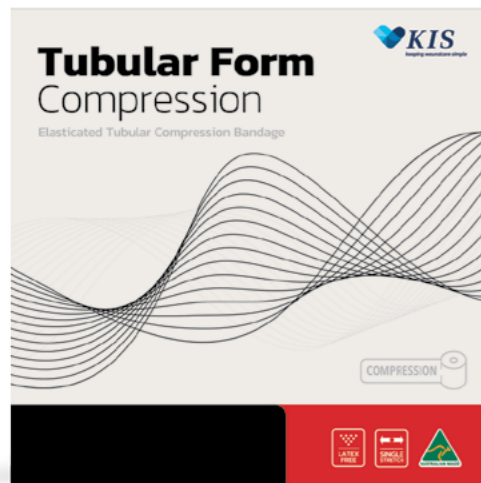

Three layers. One simple approach to effective compression.

A flexible 2–3 layer system using Tubular Form to support venous return, reduce oedema and improve patient adherence.

Graduated compression plays a critical role in managing venous insufficiency and lower limb oedema, but patient comfort and ease of application are key to long-term adherence.

Tubular Form offers a simple, adaptable approach to compression therapy. By applying 3 layers of tubular bandage, clinicians can achieve effective low to moderate compression while maintaining comfort and flexibility for the patient.

This stepwise system allows compression to be introduced gradually, improving tolerance while still delivering clinically meaningful outcomes.

sutherland medical
Supporting Australians in Health for over 30 years

Now available in Black!
offering a sleek alternative for everyday wear.

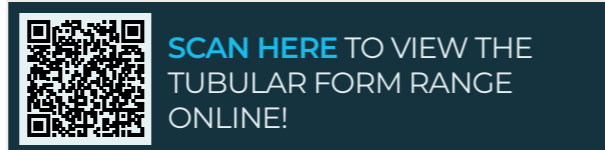

How It Works:

Three layers. Graduated support.

Layer 1 (Full length)	Layer 2 (Mid length)	Layer 3 (Short length)
Base of toes to below knee Approx. 10–15 mmHg	Base of toes to mid-calf Approx. 15–20 mmHg	Base of toes to lower calf Approx. 18–23 mmHg

Compression levels are approximate and vary depending on limb size and bandage selection.

BUILDING BLOCKS

Wound Care Education Workshops 2026

Learning outcomes:

- Identify the difference between infection and inflammation
- Recognise dressing options for specific wound characteristics
- Practice dressing application techniques
- Identify strategies to reduce the risk of common wound types
- Find out what's new in wound care
- Engage in interactive discussion and problem-solving

Welch Allyn Thermoscan PRO6000 with Small Cradle

The Welch Allyn Braun ThermoScan PRO 6000 ear thermometer featuring advanced measurement technology, has the speed and simplicity you need to capture accurate and reliable temperature readings in a comfortable way for patients. The Braun PRO 6000 advantage lies in our innovative PerfectTemp technology, which overcomes the potential for low readings compared to core, by adjusting for factors that impact measurement accuracy.

1337564 Each **\$249⁰⁰**

Welch Allyn DS66 Complete Aneroid Durashock Sphyg

This innovative gauge features a smooth trigger-style air release valve and ergonomic design with soft plastic inserts at key touch points for comfort and easy operation. With gear-free DuraShock™ technology, you can count on the robust design of the DS66 Trigger Aneroid to remain in calibration longer than traditional aneroids, providing more accurate readings over time and a lower lifetime cost, helping to improve practice efficiencies and your bottom line.

1146251 Each **\$179⁰⁰**

Welch Allyn ProBP™ 2000 Digital Blood Pressure Device

Capture fast, comfortable, automated blood pressure readings with one button touch. Combining two innovative technologies (SureBP® and FlexiPort) to support accurate blood pressure readings. SureBP technology, is a blood pressure averaging algorithm that allows the device to capture blood pressure readings on cuff inflation in a comfortable way for patients.

1407821 Each **\$279⁰⁰**

Diabetes management in an aged care setting focuses on maintaining stable blood glucose levels while supporting residents' overall health, safety, and quality of life. This involves regular blood glucose monitoring, appropriate medication or insulin administration, balanced nutrition, and individualised care planning based on each resident's comorbidities, cognitive status, and functional ability. Early recognition and management of hypo- and hyperglycaemia are essential, as timely intervention can prevent complications and improve outcomes, with care guided by multidisciplinary collaboration and regular review.
